

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original): A pressure sensitive adhesive composition

which comprises the following components (A), (B) and (C):

(A) A hydrolyzable silyl group-containing organic polymer containing at least 1.3 hydrolyzable silyl groups per molecule and having a number average molecular weight of 15,000 to 100,000;

(B) A hydrolyzable silyl group-containing organic polymer containing 0.3 to 1.3 hydrolyzable silyl groups per molecule and having a number average molecular weight of 500 to 15,000, the main chain of which polymer being substantially composed of a repeating unit or units represented by the general formula -R¹-O- (R¹ being a divalent alkylene group);

(C) A tackifier resin.

2. (original): The pressure sensitive adhesive composition according to Claim 1

wherein the main chain of the organic polymer (A) is substantially composed of a repeating unit or units represented by the general formula -R¹-O- (R¹ being a divalent alkylene group).

3. (currently amended): The pressure sensitive adhesive composition according to Claim

1-~~or~~-2

wherein the main chain of the hydrolyzable silyl group-containing organic polymers (A) and (B) is substantially polyoxypropylene.

4. (currently amended): The pressure sensitive adhesive composition according to Claim 1
~~any one of Claims 1 to 3~~

wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic polymers (A) and (B) is represented by the following general formula (I):

(wherein, R^2 represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

5. (new): The pressure sensitive adhesive composition according to Claim 2

wherein the main chain of the hydrolyzable silyl group-containing organic polymers (A) and (B) is substantially polyoxypropylene.

6. (new): The pressure sensitive adhesive composition according to Claim 2

wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic polymers (A) and (B) is represented by the following general formula (I):

$-\text{SiX}_a\text{R}^2_{3-a}$ (I)

(wherein, R^2 represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

7. (new): The pressure sensitive adhesive composition according to Claim 3
wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic
polymers (A) and (B) is represented by the following general formula (I):

$-\text{SiX}_a\text{R}^2_{3-a}$ (I)

(wherein, R^2 represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)
